Mr. Gennaco,

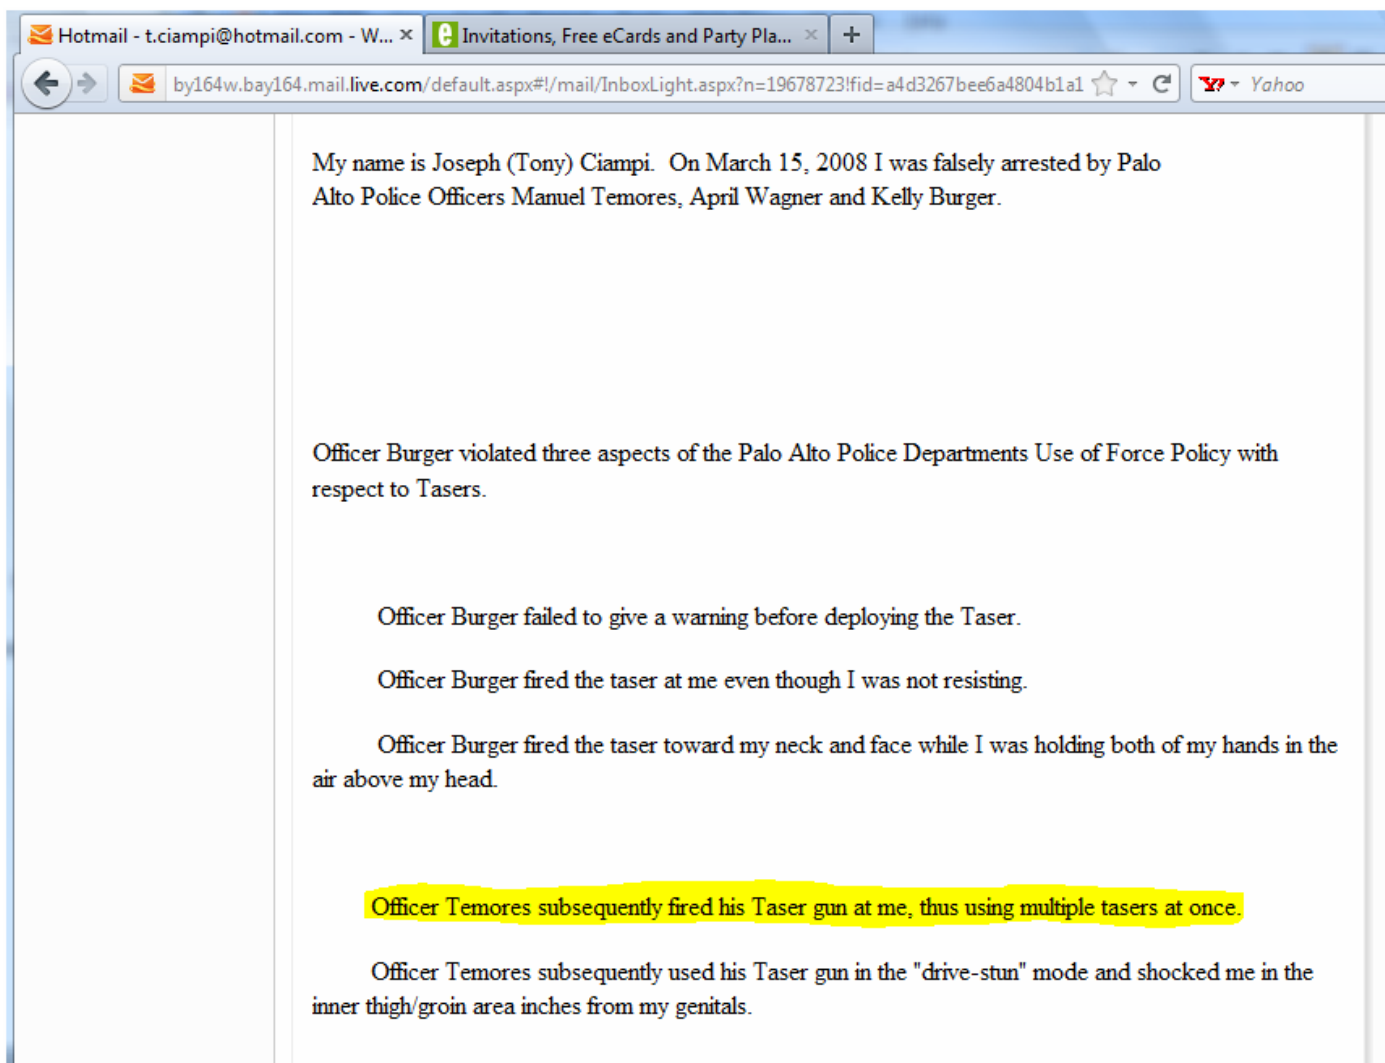

As the Chair of the Palo Alto Taser Task Force you stated on May 7, 2007 to the Palo Alto city Council,

that should the city equip it's officers with Taser guns:

"Tasers can be abused by law enforcement officers."

"A very tight policy be in place to hold officers accountable should Tasers be abused."

"There should be an outside review or auditing mechanism when Tasers are deployed so that there can be an independent determination to ensure that the policy is complied with and when it is not that officers be held accountable."

I have been charged with "Resisting Arrest."

Officer Temores is the "Arresting Officer."

He provided the video from his MAV system to the District Attorney's Office as evidence.

This video has been significantly altered. I do not know how they did it, but they did a "Professional Editing Job."

Even so, going over it with my Attorney **I spotted several flaws** which prove it has been altered.

Please note, **Officer Temores did not provide the audio portion**, as I suppose it would have been difficult to match up with the altered video. According to MAV policy, an officer is not to go out on patrol without a working MAV system and should he/she do so, he/she is to make a communications notation with the dispatch indicating that they are doing so. I do not believe that Officer Temores did this.

Mr. Ciampi:

This is in response to your e-mail and your telephonic message left with me this morning. For your information our review of the taser deployment involving you is currently pending. Please rest assured that our independent review of the taser deployment will include a review all of the information we receive relative to the incident, including the input we have received from you.

Michael Gennaco
